

Key & interpreting the data

Allergy data detailed in the table has been derived from technical specifications for a list of products defined in your 'Food Product Code & Ordering List'. If a product is temporarily substituted then the allergy data listed is not valid.

'N/i' (Not Indicated) means that the component is not part of the product. However, we cannot guarantee that the product is '100% free from' that component because of the risk of unexpected cross-contamination before it reaches our depot, or when prepared in store.

'Yes' in a column entitled 'component(s) (e.g. gluten) present' indicates that the product contains that component & is therefore not suitable for a guest with an allergy or intolerance to it.

'C' means that this component is present in the manufacturing site/factory/supply-chain & therefore it could pose a risk of cross-contamination with the product.

The **'Yes'/'No'** in the column entitled 'suitable for Vegetarians/Vegans' details information supplied by the product manufacturer. It does not take into account the in-house storage/preparation methods where cross-contamination issues could render the information void.

'data unavailable' denotes that allergy data for the product is currently unavailable from the supplier & will be added onto the table upon obtaining it. Or because it is bought at local level in-house.

Gluten is a protein component of wheat, rye, barley & oats. When guests/Coeliacs ask about wheat, flour or wheat flour then the 'gluten present' column should be consulted.

Dairy includes all products containing milk or milk derivatives e.g. cheese, butter, yoghurt.

The Treenut column indicates the presence of the following; almonds, brazils, cashews, hazelnuts, macadamias, pecans, pistachios & walnuts.

The Additives column indicates whether any of the following are present Artificial Antioxidants (A), Artificial Colours (C), Artificial Flavourings (F), Flavour Enhancers (FE), Artificial Preservatives (P) and Artificial Sweetners (S).

NB: We have taken all reasonable steps to ensure that this table is accurate. Please note this data is accurate up until the point where the products enter the store. Once displayed/heated the allergen status of the products is likely to change. Your statutory rights are not affected.
